

WHO WE ARE

ASTL was founded in 2012, on the initiative of Trasporti Pesanti and Magli Intermodal Service. Their purpose was the creation of a logistic model for the integration of co-modality in the world of steel material.

ASTL'S mission is a growing integration between rail and road transport, (aiming) to become a reference point in the intermodal transport of steel products.

SERVICES & SOLUTIONS

INTERMODAL TRANSPORT

ASTL is a specialized logistics operator that offers its intermodal network to those who produce iron and steel products: COILS | STEEL BARS | STEEL BLOOMS | STEEL BILLETS | STEEL WASTE.

We project customized solutions with the aim of meeting the delivery requirements of the goods and the supply of the raw material.

LOGISTIC AND TRANSPORTATION SERVICE

We design and develop flexible, tailored, sustainable and efficient logistics and transport solutions: WAREHOUSING | RAIL TRANSPORT | TRACKING&TRACING | STUFFING/UNSTUFFING CONTAINER | ROAD TRANSPORT | PACKAGING | CUSTOM CLEARANCE.

SUPPLY CHAIN MANAGEMENT

ASTL designs custom-made supply chain models, respecting the environment and maximum efficiency.

ASTL processes are ISO 9001: 2015 certified for the activities of: supply of integrated multimodal logistic services and terminal infrastructures management.
